#### Description

1. ChargeWatch app is showing the wrong time in the Recent Issue List.
2. When a ticket is assigned, the user should receive a notification so they know that the issue has been assigned.
3. In the Assigned Issue List, the Assign button inside the 3-dot menu is not working when trying to assign an issue.
4. In the Assigned Ticket List, after searching for an issue, clearing the search box should display all issues again. Currently, the issues only appear after going back.
5. On the Ticket page, the "In Progress" ticket count is showing 3, but only 2 tickets are displayed when opening the In Progress ticket list.
6. In the Open Issue List, the search box is not working properly. When searching for "Wallet Issue," it also shows "System Issue" results.
