Description			
New Partner CMS with new theme			

History

#1 - 07/23/2026 09:09 AM - Saransh Bakoliya

Today i have worked on ->

Analyzed the existing Partner CRM folder structure to establish a scalable UI architecture.

Reviewed all newly created Partner CRM components for proper responsibility separation.

Planned a reusable theme-first approach instead of applying styles directly in dashboard pages.

Created the initial partnerCRMTheme.ts structure for centralized Partner CRM styling.

Defined typography strategy for consistent headings, body text, captions, and button styles.

Planned a dedicated color palette inspired by Velzon while keeping compatibility with the existing project theme.

Defined global background, paper, divider, and text color configurations for the Partner CRM.

Planned reusable border radius, elevation, and shadow system for dashboard components.

Designed global MUI component overrides for Cards, Papers, Buttons, Chips, Tables, Avatars, and Dividers.

Planned responsive typography configuration for improved readability across screen sizes.

Finalized the theme hierarchy before beginning individual dashboard component styling.

Identified PartnerCRMLayout.tsx as the next integration point for applying the custom theme.

Planned ThemeProvider and CssBaseline integration for consistent styling across Partner CRM pages.

Planned reusable dashboard container spacing, padding, and layout configuration.

Identified PartnerCard.tsx as the shared card component for all dashboard sections.

Planned reusable metric card and chip components to eliminate duplicated dashboard styles.

Decided to postpone dashboard-specific UI modifications until the reusable design system is completed.

Established a component-first workflow to ensure consistent styling and easier future maintenance.

Prepared the Partner CRM foundation for seamless integration of the upcoming dashboard redesign and reusable UI components.
