Target version:		Spent time:	0.00 hour
Description			
Issue: GST tax amounts are not being displayed correctly in the invoice preview.			
Requirement:			
If CGST and SGST are applicable, display CGST and SGST separately.			
If CGST and SGST are not displayed/applicable, the IGST amount should be calculated as:			
IGST = CGST + SGST			
The total tax amount should remain unchanged after converting CGST + SGST into IGST.			
The invoice preview and downloaded PDF should show the correct IGST amount.			
Ensure the calculation is applied consistently for all invoice formats.			
Example:			
CGST = ₹50			
SGST = ₹50			
IGST = ₹100			
Expected Result:			
When CGST and SGST are not shown in the invoice, their combined tax amount should be displayed under IGST.
