Description			
need to made design more user attractive in ocpi vendor and some fixes in customer and vendor also			

History

#1 - 09/09/2026 09:18 AM - Shreya Agarwal

OCPI Reconciliation UI Alignment: Aligned the result filter tabs styling on the OCPI Session Reconciliation page (/reports/ocpi-vendor/session-reconciliation) to match the primary theme design pattern of the Session Details Report.

Tab Container Refactoring: Moved the reconciliation filter tabs into a dedicated standalone card layout, eliminating hardcoded multi-colored tab backgrounds and applying primary brand styling.

Sidebar Label Updates: Renamed sidebar menu items from Finance Customers to Customers and Finance Vendors to Vendors.

Header Title Update: Updated the page header title on the Customer management page from Finance Customers to Customers.
