

training - Bug #3201

Partner Login - Payouts - Share Calculation modal is not responsive — content overflows/doesn't fit within the card/modal

09/29/2026 01:47 AM - Srishti Sikarwal

Status:	New	Start date:	09/29/2026
Priority:	Normal	Due date:

Target version:		Spent time:	0.00 hour
Description			
Steps to Reproduce:			
Open Partnerships → any Partner → Share Calculation for a period. Observe the modal layout (cards row, breakdown table, right-edge content behind the modal). Resize the browser window / check on smaller screen widths.			
Expected: Modal and its content (summary cards, calculation breakdown, values) resize/reflow responsively to fit within the viewport at all screen sizes, with no clipping or hidden content.			
Actual: Modal content does not fit properly — layout appears cut off / not adapting to screen width (e.g. background table content visible/overlapping at the right edge, cards row not scaling down on smaller widths).			
Impact: Poor readability and unprofessional look on smaller screens/resolutions; key financial breakdown may get clipped or hard to read.
