

training - Bug #3233

Update "Charger Name" Column in Charger List to include "Display Name" in the middle in charging-station-management

10/01/2026 05:00 AM - Shreya Agarwal

Status:	New	Start date:	10/01/2026
Priority:	Normal	Due date:	
Assignee:	Shreya Agarwal	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	3.00 hours
Description			
the "Name" column currently only displays the Primary Name (e.g., "Machine1") on top and the Identifier/Model Name (e.g., "machine-1") below it. It is missing the Display Name. so add display name in middle			

History

Today's work on the Charging Station Management page (/charging-station-management). When editing any station and opening the Assignment > Charger Management tab, the chargers table's Name column was only showing the machine name, model, and machine code. The requirement was to dynamically show the charger's Display Name in the middle (just below the machine name) in a highlighted black color, matching the reference design.

Next, the necessary updates were completed safely. The displayName property was added to the ChargingMachine interface for type safety. Then, the Name column was updated to show the dynamic display name using dark/black highlighted text (color: 'text.primary', fontWeight: 500) right under the machine name.

also start a new work which is in different ticket .
