Description

enhance the charger-analysis page

History

#1 - 11/17/2026 08:17 AM - Shreya Agarwal

Today's work focused on refining the layout and responsiveness of the WhatsApp preview inside the "Message for the technician" section on the Charger Analysis report page (/reports/session/charger-analysis) on branch feature/shreya/3489-reports-session-charger-analysis-enhancement. In src/components/chargerAnalysis/TechnicianMessagePanel.tsx, the WhatsApp message bubble was realigned from the right side to the left side to eliminate redundant empty space and provide a clean, natural alignment. To ensure no excess width is consumed while remaining fully responsive across all devices, the bubble styling was updated with width: 'fit-content', adaptive responsive maxWidth constraints , and an authentic left-side WhatsApp bubble border radius (0 10px 10px 10px) and testing also done in this
